

## OPTISPERSE™ ADJ5150 Liquid Caustic 25%

- Easy-to-use liquid
- Alkalinity adjustment
- Low freeze point

### DESCRIPTION AND USE

OPTISPERSE™ ADJ5150 is a 25% caustic soda solution used to control boiler water alkalinity. Because this product is a liquid, the hazards associated with dissolving dry caustic soda are significantly reduced. OPTISPERSE ADJ5150 has a freeze point of approximately -16°C (3°F) and as such is much less temperature sensitive than 50% caustic solutions.

### TREATMENT AND FEEDING REQUIREMENTS

Proper treatment levels for OPTISPERSE ADJ5150 depend on many factors particular to a given installation. The product should be used in accordance with control procedures that GE Betz establishes for a specific application.

OPTISPERSE ADJ5150 may be fed neat or diluted to any convenient strength with softened makeup, condensate, or feedwater.

### GENERAL PROPERTIES

Physical properties of OPTISPERSE ADJ5150 are shown on the Material Safety Data Sheet, a copy of which is available on request.

### PACKAGING INFORMATION

OPTISPERSE ADJ5150 is a liquid blend, available in a variety of containers and delivery methods. Contact your GE Betz representative for details.

### STORAGE

Store OPTISPERSE ADJ5150 at moderate temperatures and protect from freezing. If frozen, thaw completely and mix thoroughly prior to use.

### SAFETY PRECAUTIONS

A Material Safety Data Sheet containing detailed information about this product is available upon request.
